DIGITAL TRANSFORMATION IS COMING

ARE YOU READY?

Advanced innovation has and will proceed to alter the way we live, work, and communicate.

Numerous businesses nowadays have begun to incorporate advanced change for its various benefits, such as diminished costs, expanded productivity, adaptability and improve client's experience.
To fill the gaps that computerized innovations create, it is critical to choose advanced solutions suitable for your business demands, therefore, working with the best partner that has the right solutions and innovations to back you on your journey to digital transformation is key.

〉〉〉 Let us guide you during your transformation to the digital world.

ABOUT US

IT Cloud is the leading service provider for companies across business sectors. If you are aiming to scale faster, optimize your investments and reach your goals, IT Cloud is your best choice.

Our connections are our greatest asset. Through our partnerships, people, services, and delivery, we will help you optimize and improve the performance of your IT environment.

We combine our expertise with the world's leading technologies- across applications, data, and security- to deliver end-to-end solutions.

We assist you in meeting your business goals by keeping you up to date, up-to-speed and fully informed through our collaborative experienced team.

We have clients in public and private divisions from wide variety of sectors such as Governmental, Medical, Banking, Educational and many more.

The Cloud Transformation Has Begun- Are You Ready?

Many businesses have adopted cloud computing in their operations in the past few years. Cloud computing or on-demand computing sometimes refers to a system of using computer services over the internet.

MISSION

We aim to help businesses with their digital presence through providing top quality IT solutions.

VISION

To be people's number one choice when it comes to digital services and provide exceptional IT solutions to elevate all business.

OBJECTIVES

We aim to give best service and solutions to maintain long term business outcomes. Striving to be on the top in providing the accessibility for all our clients.

WHY IT CLOUD

Accessibility

Integrity

Scalability

Cost

Security

IT SECURITY

IT security is a set of cybersecurity strategies that prevents unauthorized access to organizational assets such as computers, networks, and data. It maintains the integrity and confidentiality of sensitive information, blocking the access of professional hackers.

Endpoint Security

Endpoint security will prevent your devices from accessing malicious networks that may be a threat to your organization.

Cloud Security

Cloud security refers to the technologies, policies, controls, and services that protect the data, applications, and infrastructure in the cloud from threats.

Network Security

Protection against known, unknown, and undisclosed threats.

Cybersecurity

Protect application secrets and cryptographic keys. Leverage easily integrated tools that won't disrupt your roadmap. Code Obfuscation. On-Prem or Cloud.

Enterprise Security

Solutions & Services to Predict, Prevent, Detect & Respond to Cyberattacks.

Email Security

Email security uses technology to inspect incoming emails for malicious threats and encrypt--or secure--outbound email traffic to protect mailboxes, data, users, and organizations from cybersecurity attacks and schemes.

IT SECURITY PARTNERS

NEEDS & REQUIREMENTS

NEEDS

- Increase own agility.
- Minimize datacenter investments.
- Maximize existing investments by adopting hybrid cloud approach.

REQUIREMENTS

- Specific security controls.
- Specific compliance requirements.
- Specific government oversight requirements.

OUR SOLUTIONS

DATA CENTER

We design and custom build Scalable, Secure and Efficient Data Center environments with optimized resource utilization. We also provide migration and system upgrade services.

CLOUD SOLUTIONS

Build, Manage, Migrate and Maintain the cloud-based application in IaaS, PaaS and SaaS. Streamline operations. Adhere to compliance and regulatory requirements. Increase data accuracy and auditability

SECURITY

Safeguard your business technology and data assets, ensuring that your business operations are protected and always available. Our solutions can help transform your data center with reliable, advanced products developed to keep you up to date as every minute counts.

SOFTWARE AND STORAGE

We provide services that go beyond software and storage. We work with our clients to develop policies, implement them, validate the implementation, and regularly test the data.

VIRTUALIZATION

Create the right virtual machine for your Windows or Linux operating system-based workload. Deploy your own Windows or Linux VM image or download images.

NETWORKING

Networking & Solutions can help you streamline your systems to improve business performance. Services provided are equipped with the necessary resources. In addition to optimizing fault management and ensuring availability, we help you manage faults and performance, manage change and configurations in order to ensure compliance, and automate IT processes.

OUR PROCESS

Consult

We analyze your business needs and recommend the best solution.

Plan

We plan your end-to-end solution that will help you achieve your goals.

Execute

We execute the final plan from scratch based on specific requirements for your business to reach its goals.
